PREFACE

Greetings!

Years ago, DACUN has continuously published several volumes of *Index to Periodicals* which have served as valuable information retrieval tool for librarians and library users not only for the DACUN institutions but also to all those who accepted the previous volumes as a vital information sources.

As a 10th year offering of the DACUN *Library Committee,* this year's publication is focused on the multimedia resources of DACUN Libraries expressed in its title, the DACUN Multimedia Index (DMMI). A different cover from the previous publications, DMMI was conceptualized to give access to multimedia resources which have been in existence in most of our libraries, but are less utilized.

This index aims to address the need for information more than those that can be read in books and periodicals. It also gives access to information in various format of information which can only be provided through the multimedia resources available in libraries.

Included in this volume the following multimedia materials both in print and non-print: electronic resources (CD-ROMs), video recordings (DVD, VCD & VHS), sound recordings (CD & cassette tapes), maps, charts and transparencies. Just like the previous technical working groups, the present indexers remain authentic to the rationale of publishing this work, i.e., to provide assistance to knowledge and information seekers all over the world.

With great pride, we are now offering the newest face of the DACUN indexes, the DACUN Multimedia Index (DMMI).

ISAVAL MAE I. CALUNSAG
Librarian, HCDC &
Chairperson, DMMI
